**Like Nothing You've Seen Before**

**SLUMPED GLASS SHOWER DOOR HANDLES**

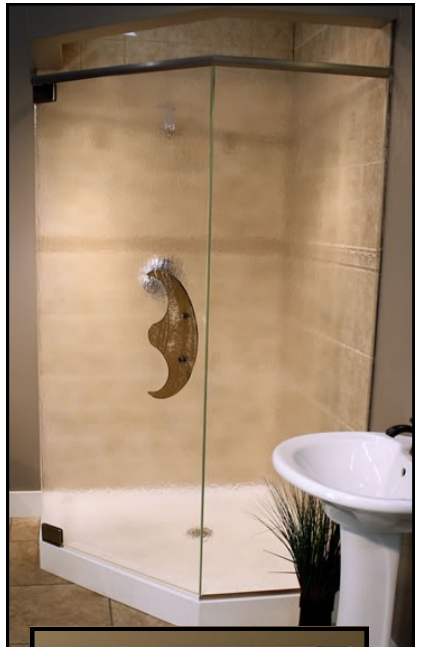

Slumped Glass Door Pulls

- **Glass** - All pulls are made out of 10mm toughened slumped glass, and are available in six colours
- **Hardware** - Handles are mounted on 20mm standoffs. For shower enclosures, either a pull knob or a back-to-back handle (for retrofit 203mm handles) can be used. Hardware is available in Chrome, Brushed Nickel.
- Due to the nature of the slumping process, each handle is unique. While the shape will be the same, the cast pattern of your handles will vary.

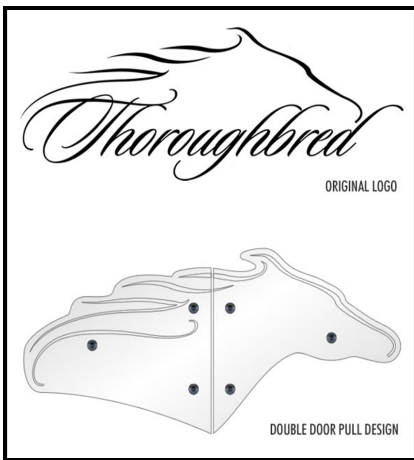

**Retrofit Designation:** Units with a retrofit designation can be installed on an existing enclosure with 12mm diameter holes for a 203mm pull spaced 80mm or more away from the edge of the door. All other handles require a door made with matching holes.

**More Designs on the website with sizes & hole details.**
